

Peace of mind, with PSW senior care that's supervised and case managed by Registered Nurses - *at no additional charge*

What we do.

Eldercare Home Health has been providing Registered Nurse supervised and case managed care to seniors in the Toronto area since 1995.

We offer solutions that help seniors stay happy, independent and safe in their own homes, retirement residences, nursing homes and hospitals.

We start by providing a no-charge in-home assessment conducted by one of our qualified Registered Nurses.

We have the skills & experience. We know the healthcare system, so you don't have to.

Our service starts with the RN assessment and includes a medication review, creating a care plan, accessing and co-ordinating supportive services and scheduling caregivers. Our caregivers assist with bathing and personal care, provide companionship, help with meal preparation and assist clients with all activities of daily

"We've tried other healthcare services, Eldercare Home Health really is the best. You don't take chances when it's your parents. I'm happy to recommend Eldercare Home Health."

- Melina Tulk, Client's daughter

"The care, supervision and coordination of service was excellent."

- Mr. David Sprague, Client's son.

living (ADL). We can also arrange for Physiotherapists and other professionals to provide assessment and treatment as required.

At Eldercare Home Health we work in cooperation with your doctor, your pharmacist and government agencies. Our staff have the knowledge, skill and commitment to provide the highest level of care. And of course we provide the expertise of a Registered Nurse to supervise all care.

"I would definitely recommend Eldercare Home Health as the caregiver of choice for seniors and their families."

- G. Bell, Power of Attorney

Having the right help can make a big difference and can be surprisingly affordable.

Many of our clients are in the same homes they have lived in for years. Others live in retirement homes and some are in nursing homes.

Wherever home is, having the right help can make a big difference. It means remaining as active as possible, having someone to help and someone to talk to.

Our rate is very competitive (minimum shift is 4 hours) and we are the only health care service offering a truly comprehensive and specialized elder care program.
